DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 17-19,38,39 and 42, drawn to a computer system having clock that regulates timing of activities at the destination computer, providing a logical structure for encapsulating multiple streams, **storing clock licenses in each packet**, classified in class 370, subclass 229.

II. Claims 20-23 and 40, drawn to a distributed system providing format for multiple streams, a field in a logical structure which **specify a packet size of multiple streams**, classified in class 709, subclass 231.

III Claims 24-26, drawn to a data processing system providing a format for multiple streams, dynamically defining a new media type, **storing an identifier of new media type**, classified in class 348, subclass 385.

2. The inventions are distinct, each from the other because of the following reasons: Inventions I,II & III are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the

Art Unit: 2142

evidence or admission may be used in a rejection under 35 U.S.C. §103(a) of the other invention.

3. Because these inventions are distinct for the reasons given above and the search required for Groups I,II & III are different, restriction for examination purposes as indicated is proper.

4. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17(h)..

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Thong Vu, whose telephone number is (703)-305-4643.

The examiner can normally be reached on Monday-Thursday from 7:30AM- 4:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Powell, can be reached at (703) 305-9703.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 305-9700.
